

New From Paramount Die "The T30 Insert Series"

PARAMOUNT DIE EUROPE

ADVANTAGES over Standard R Series

- A. 30% Longer than R8 or R9 Series dies**
- B. Manufactured from H10F Carbide.**
- C. Submicron carbide with 10% Co resulting in a higher Vickers rating which results in longer die life.**
- D. Longer length allows for a wider range of reduction angles resulting in better Delta factors.**
- E. Longer angle length allows more area for the lubricant to form between the dies approach angle surface and the incoming wire.**
- F. Wire size range covering both the R8 and R9 series dies from 0.256" to 0.625" (6,50mm to 16,50mm).**
- G. Tapered OD for maximum heat transfer to the cooling media.**
